

Sean M. Weiss, CPC, CPC-P, CCP-P, ACS-EM

Sean serves as vice president and chief compliance officer of DecisionHealth Professional Services, a DecisionHealth company.

As a management consultant and speaker, Sean has worked with hundreds of physicians, medical groups, hospitals, and medical and management societies to meet the challenge of delivering medical care in a complex marketplace without sacrificing government compliance.

Sean has held positions of significance with some of the industry's most recognized and respected organizations. Sean was a founder and principal of the The CMC Group, a full-scale medical consultancy and legal research firm based in Atlanta, Georgia. As the former director of consulting and research for The Medical Management Institute, he oversaw the day-to-day operations of the consulting department and all consulting projects throughout the U.S. Sean served as senior analyst and compliance consultant for Tenet Health Systems (Southeastern Region), where his responsibilities ranged from the performance of coding audits and implementing formal training and educational programs to working on compliance issues and leading communication meetings among providers and senior management. Sean also served as a physician services consultant for the Health Information Management Systems Department for HCA/The Health Care Company. Sean's responsibilities with HCA included serving as a coding consultant responsible for coding compliance monitoring through the performance of audits and education for those providers who were owned and/or managed by HCA. During his tenure with HCA, Sean also served on the Steering Committee that worked to develop policies and procedures and assist with special projects for the legal department.

Sean is an author or contributing author to multiple model compliance programs (HIPAA, OIG, OSHA, personnel policies and procedures) as well as publications on Medicare, Evaluation and Management services, coding and specialty-specific training. Sean is also a contributing author for several medical practice coding, compliance and management periodicals and online discussion groups reaching tens of thousands of readers every month.
